

Massachusetts: January 31st - February 1st, 2025

Wet Snow Follows Rain on February 1st

Start: 6 - 8 AM February 1st **End:** 1 - 3 PM February 1st

After a substantial rainfall, the final hours of a long duration storm brought snow to the region starting 6 - 8 AM February 1st, when temperatures were around 32 degrees. As snow steadied and fell at a moderate to briefly heavy intensity, northerly winds that gusted 20 - 30 mph brought in colder air. This resulted in temperatures dropping into the upper 20s by the time snow tapered off 1 - 3 PM.

Zipcode	City	Type	Total	Freezing Rain	Notes
02050	Marshfield	Snow	1.3"	0.00"	
02061	Norwell	Snow	2.1"	0.00"	
02190	Weymouth	Snow / Sleet	2.0"	0.00"	

Snow & Wintry Mix January 31 - February 1

Start: 10:30 PM January 31st - 1:30 AM February 1st **End:** 11 AM - 2 PM February 1st

Following considerable rainfall earlier in the day, pockets of wet snow and sleet began to mix with rain starting 10:30 PM January 31st - 1:30 AM February 1st, when temperatures were in the mid 30s. Precipitation temporarily lulled to drizzle and spotty light rain into the predawn of February 1st. An additional push of moisture arrived 4:00 - 7:00 AM causing a change to wet snow with some sleet. Initially it was rather light, but during the mid to late morning, snow turned moderate for a few hours, which combined with northerly winds that gusted up to 30 mph resulted in the temperature falling into the upper 20s by the time snow tapered off 11 AM - 2 PM February 1st. This temperature drop resulted in icy areas developing, in addition to the snow accumulation.

Zipcode	City	Type	Total	Freezing Rain	Notes
