Quick Moving System Brings Snow Then a Wintry Mix on February 6th

Start: 7 - 9 AM February 6th **End:** 3 - 5 PM February 6th

A quick moving system swinging through the region brought periods of snow beginning 7 - 9 AM February 6th. After starting at a light intensity, snow became briefly moderate for a time late morning. Snow trended lighter after midday as warmer air mixed in aloft, allowing for precipitation to briefly mix with some sleet pellets, before giving way to freezing rain showers in mid afternoon. Freezing rain showers changed to plain drizzle 3 - 5 PM as temperatures increased to 33 - 35 degrees. The combinations of snow, sleet, and freezing rain resulted in a dense and tough to deal with accumulation.

Quick Moving System Brings Snow Then a Wintry Mix on February 6th

Start: 7 - 9 AM February 6th **End:** 5:30 - 7:30 PM February 6th

A quick moving system swinging through the region brought periods of snow beginning 7 - 9 AM February 6th. After starting at a light intensity, snow became briefly moderate for a time late morning. Snow trended lighter towards midday as warmer air mixed in aloft, allowing for precipitation to briefly mix with some sleet pellets, before giving way to freezing rain showers after midday. Freezing rain showers decreased to pockets of freezing drizzle which lingered at times before tapering off 5:30 - 7:30 PM. Temperatures started between 20 - 25 degrees, but quickly increased to 28 - 32 degrees through the remainder of the event. The combinations of snow, sleet, and freezing rain resulted in a dense and tough to deal with accumulation.
